

CENTRE FOR  
CYBERSECURITY  
BELGIUM

● 2026 – QCTR2

Miguel De Bruycker

# ● AI-Generated Content

*Who are you,  
Whats your name?*

→ Balanced approach

- High assurance MFA (zero trust, digital identity, ...)
- Cross-Border Portability
- Efficient “Know Your Customer”
- Digital Exclusion
- Single Point of Failure / Hacking
- Monitoring of social behavior, internet access, ...

# ● Anthropic, Claude Mythos.

- Multiple AI model capabilities evolve
  - Automated **Zero-day discovery**
  - High speed **Patch reversal & exploitation**
- Protection **must** evolve
  - Real-time & Virtual patching
  - Strict segmentation
  - AI powered MDR
- Does that mean ALL – IN – Cloud ?

# ● ALL – IN – Cloud ?

*Hackers can discover and exploit bugs faster than organization can fix them*

- Who will be capable to secure their environment
- Impact on EU sovereignty debate?
- Impact on Open-Source software?
